

This code appears to be for an email invitation to a Humber College Virtual Open House about the Media & Creative Arts programs.

The code uses HTML and CSS. HTML provides the structure of the content and CSS styles the look and feel of the email.

Here's a breakdown of the code:

- **HTML Structure:**
 - The <html> tag defines the root of the HTML document.
 - The <head> tag contains meta information about the document like character encoding and title.
 - The <body> tag contains the visible content of the email.
 - Within the <body> tag, there are elements like <header>, <main>, <footer> that define different sections of the email.
 - There are also elements like <h2>, <p>, etc. that define headings, paragraphs, unordered lists etc.
- **CSS Styling:**
 - The <style> tag contains the CSS code that styles the HTML elements.
 - Styles define properties like font size, color, background etc. for different elements.
 - This code uses media queries to adjust styles for different screen sizes (tablets and mobiles).

Overall, the code builds a visually appealing email inviting prospective students to a Humber College Virtual Open House about the Media & Creative Arts programs. It highlights current students and the benefits of the program. There's a call to action to connect with current students and learn more.
